Sensi Outdoor Sensor

Sensi outdoor sensors are designed to remotely monitor the precise temperature and humidity level outside of your house. When paired with the Sensi Touch 2 smart thermostat, an outdoor sensor can control the balance point and auxiliary lockout of your heat pump system.

TEMPERATURE AND HUMIDITY MONITORING

View outdoor temperature and humidity level right from your thermostat or app. The temperature monitoring range goes from -40°F to 150°F.

EASY SETUP

Setup is easy through your smart thermostat. Once connected, go to your advanced settings on the thermostat and select “outdoor sensor” for your balance point setting.

EXTENDED RANGE

Place anywhere on your property with a range of up to 100ft.

WEATHERPROOF

Lab tested to ensure functionality in all types of weather.

WORKS WITH SENSI TOUCH 2

Compatible with the Sensi Touch 2 smart thermostat.
