Residential Whole-House (GFI #3220, 3160, 8220 & 8160)

GeneralAire® Models ERV/HRV

Energy & Heat Recovery Ventilators

Breathe Healthier

Bring Fresh Air Into Your Home.

Keeping windows open 24/7 to get fresh air is not always possible due to weather, safety or noise concerns. Installing a GeneralAire® ERV / HRV ensures indoor air is fresh all the time, all year long.

How The ERV/HRV Works:

An HRV brings fresh air into a home while simultaneously exhausting stale air out. An ERV transfers heat and moisture during this exchange of air.

Details inside or go to: www.generalfilters.com/ERV-HRV

Maintenance

Maintenance of your new GeneralAire® ERV / HRV is minimal. Simply follow suggested maintenance instructions every 6 months. Go to: [www.generalfilters.com / support center / video library](http://www.generalfilters.com/support-center/video-library) to watch a video demonstrating how to perform maintenance on your HRV / ERV.

Install An ERV Or HRV In Your Home To:

Remove Odors And Smoke:

Whether from cooking, hobbies, pets, garbage, or smoking, your ERV / HRV will help eliminate annoying odors! In addition, tobacco products contain as many as 4,000 different chemicals; 50 of which are known to be cancer-causing carcinogens. Reduce tobacco smoke levels indoors with an ERV or HRV.

Reduce Moisture:

ERV's and HRV's can help to reduce moisture in your home while exchanging fresh outdoor air with stale indoor air.

Why A Whole-House Unit?

- Treats Your Whole House 24 / 7 / 365
- Requires Minimal Maintenance
- Ventilates Your Home Regardless of Weather
- Out of Site
- Quiet
