

INSTRUCTIONS FOR Y650 BRACKET

BOX INCLUDES:

(1) CROSSBAR (A)

(2) 90° L BAR BRACKETS (B)

MOUNTING ACCESSORIES (3 PACKAGES)

1.) Mount Crossbar. Use the level embedded in the crossbar to ensure the crossbar is level. Make sure to attach to the wall using hardware/anchor designed for the material type you are mounting into and can properly support the weight and specifications of your unit.

2.) Unfold the L-Bar brackets and slide them on the crossbar to the proper position. Use bolts provided in package 2 to lock L-Bar brackets in place.

3.) Adjust angle of L-Bar Brackets and secure Mini-split Condensing Unit using the hardware in package 3.

PACKAGE 1

PACKAGE 2

PACKAGE 3

PACKAGE 1 – Please ensure for your installation that package 1 is going to properly support your bracket, and the weight of the unit. The type and size of anchor required may change based on the material you are mounting into, and the weight specifications of your unit.

PACKAGE 2 – BOLTS FOR SECURING THE L-BAR BRACKETS IN PLACE.

PACKAGE 3 – ANTI-VIBRATION PADS AND BOLTS TO BE USED WITH L-BAR BRACKETS
