Power Options

You can either hardwire (12/24V AC/DC) or plug it in using the provided USB cable & adapter.

On-Device Controls

Power on/off, temperature settings, swing position, fan speed, mode, Presets.

Display

Equipped with a sharp LCD display, showing room temperature & humidity, set temperature, fan speed, AC mode & more.

(Turn off display or adjust brightness via the app)

Table Stand

Comes with a free table stand, allowing you to easily place device on a desk.

Wall Mounting Kit

Easily mount your device on the wall with a free kit that comes in the box.

Global Controls

View and manage your AC or heat pump settings from anywhere using the free Cielo Home app for iOS and Android.

Weekly Schedules

Set schedules for your heating and cooling to automatically run on your desired settings as per your routine.

Comfy Mode

Set preferred temperature or humidity triggers to automate your climate for perfect room conditions.

Comfy Max

Automatically adjusts your AC settings with intelligent AI triggers to achieve your desired temperature for ultimate comfort.

Cielo Linked (Integrated Controls)

Link your ducted and ductless HVAC systems using Cielo devices

Presets

Predefined comfort settings for different situations, including Home, Away, and Sleep.

Geofencing

Location-based triggers to automatically turn your AC on or off as you enter or leave an area.

Turbo Mode

Activates fast cooling or heating to quickly achieve your set temperature.

* Your AC model must support this feature.

Follow Me

AC relies on your smart controller's in-built sensors to detect the temperature of the area where it is installed.

* Your AC model must support this feature.

Timer

Allows you to quickly set the run time of your AC.

Freeze Protection

Prevents freezing temperature in extreme cold weather conditions by running your AC at minimal power.

* Your AC model must support this feature.

Temperature Range Lock

Lock minimum and maximum temperature set point values. This restricts unnecessary temperature changes & is ideal for rentals to save energy.

Warranty

1 Year Limited Warranty

Support

Free Support Included

AI-Based Comfy Max Mode

Simply set the desired room temperature level, and it will automatically maintain it throughout the day.

AI-Based Auto Detection Algorithm

Works with **500+** brands and **25,000+** AC models. **Automatically detects** an air conditioner brand and its model.

Industry's Best **Integrated Controls**

(Auto-Switching Between Heat Pump & Fossil Fuel Based Heating System)

Designed to automatically switch between an electric source heat pump and a fossil fuel heating system based on a predetermined outdoor temperature. **Cielo Linked** helps you minimize the use of Aux heat (boiler or furnace) while optimizing the use of a heat pump, resulting in increased savings and comfort.

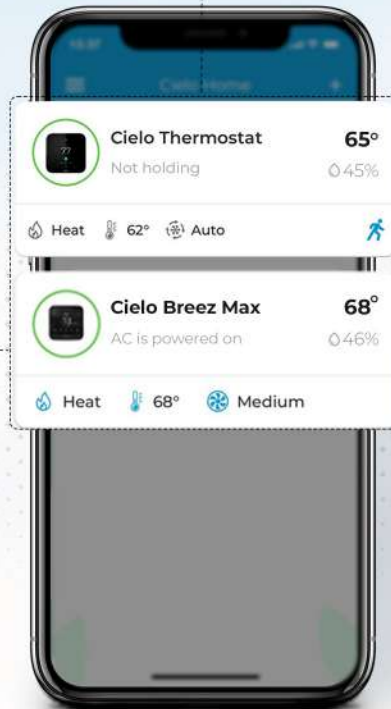

Industry's Best **Integrated Controls**

(Auto-Switching Between Ductless Heat Pump & Fossil Fuel Based Heating System)

Cielo Breez Max
(Smart AC Controller)

Ductless Heat Pump

Cielo Smart Thermostat

Fossil Fuel Based Heating System

Designed to automatically switch between ductless heat pump and a fossil fuel heating system based on a predetermined outdoor temperature. **Cielo Linked** helps you minimize the use of fossil fuel based heating system while optimizing the use of a ductless heat pump, resulting in increased savings and comfort.

Smart Home Compatibility

The Cielo Smart Thermostat is an attractive, well-priced smart thermostat that will make heating and cooling your home easier and more efficient.

This Wi-Fi enabled smart A/C controller turns your air conditioner or heat pump into a smart, easily manageable resource.

Offering the same smart control features for regulating a central air conditioning system to one of those manual old-school and — pardon the term — dumb AC units.
