

WFCC: What's included

Smart orb, short wire adapter, mounting hardware

Remote control (please discard) and batteries (not used in the install) plus the long wire connector (used during the installation)

USB wifi adapter and QR code

WFCC: Installation

Remove the back panel of the orb Insert the USB adapter into the orb

Take the red end of the short wire adapter and connect it to the CN40 4 pin connector on the board of the air handler

CN40,4 pin connector for a ceiling cassette. This may be in a different location on the board if installed with a concealed duct or floor ceiling air handler.

Then connect the long wire connector to the black end of the short wire adapter

Connect the other end of the long wire connector to the wire on the orb.
